

Teak, the premier timber species face shortage of propagules in the form of seeds and vegetative cuttings. IFGTB is producing teak from selected germplasm through tissue culture. Midterm growth performance of these plants in farmlands shows promising results. Tissue culture Teak plants are available at **Institute of Forest Genetics & Tree Breeding, Coimbatore**. The cost of plant is Rs.55/-. For more details contact IFGTB Coimbatore. Phone: 9488450674, 9715147306, 9043699205.
