

Pre-campaign Celebration of World Environment Day 2025

“Plastic removal drive”

The United Nations adopted June 5th as the World Environmental Day to raise global awareness and promote environmental action. Since its inception, World Environment Day has adopted a theme for each year to focus on pressing environmental concerns. This year's theme is "Beat plastic pollution". As part of the Mission LiFE, and in observance of World Environment Day (WED) 2025, ICFRE-IFGTB organised a “Plastic removal drive” on 03.06.2025 at 3:30 pm in the forest campus. Dr. R. Yasodha, Director, ICFRE-IFGTB inaugurated the program. She commented on the impact of plastic pollution and the urgent need to curb the pollution. She also urged the participants to avoid single use plastics and go for sustainable alternatives. Around 100 members participated in the program including Scientists, Technical staff, Project staff, Research scholars and interns. Around 20 bags of plastic waste were collected and disposed of during the drive.
